

COUPLING DEVICE FOR FACILITATING COMMUNICATIONS BETWEEN A PHYSICAL LINE AND A WIRELESS TERMINAL

ABSTRACT OF THE DISCLOSURE

5 A communication device (20) includes a wireless communication terminal
(22) and a coupling device (24) that facilitates communications between the wireless
terminal (22) and a physical line (26). The coupling device (24) includes a stripline
conductor (40) that is placed near the antenna (30) of the wireless terminal to establish
a proximity coupling between the strip line conductor and the antenna (30).
10 Communication in either direction between the wireless terminal (22) and the
physical line (26) are facilitated by the coupling device (24) of this invention.
